

🌟🌟🌟 Day 50 of Our Daily UiPath Q&A Challenge! 🌟🌟🌟

Welcome to Day 50 of our exciting UiPath Q&A Challenge! Each day, we'll be answering one key question to help you master UiPath and revolutionize your automation journey. 🚀

➡ Question for Today

How to assign Machine Object to folder?

Assigning a machine object to a folder enables execution of the processes contained in that folder for all unattended workstations that are employing that machine object to connect to Orchestrator.

Machines are tenant resources, meaning global resources that are created at the tenant level and are available across folders. Administrators can perform machine assignments from a centralized location of all folders at the tenant level (Tenant > Folders), or they can do it in the context of each folder (folder context > Settings > Machines).

Items per page: 10

Folder context

The screenshot displays the UiPath Orchestrator interface. The left sidebar shows a folder tree under 'My Folders' with 'Loans' expanded, and 'Personal Loans' selected. The main area shows the 'Machines' tab for the 'Personal Loans' folder. A table lists machines with columns for Name, Description, User mappings, Type, Machine Assignment, Unattended, Non Production, and Testing. The bottom of the table shows pagination: '1 - 3 of 3', 'Page 1 / 1', and 'Items per page: 10'.

Callout 1: Points to the 'Loans' folder in the left sidebar.

Callout 2: Points to the 'Settings' icon in the top right navigation bar.

Callout 3: Points to the 'Machines' tab in the 'Manage access' section.

Callout 4: Points to the context menu (three dots) next to the 'petrina.calota@uipath.com's wo...' machine entry.
