

Welcome to Day 12 of our exciting UiPath Q&A Challenge! Each day, we'll be answering one key question to help you master UiPath and revolutionize your automation journey.

🚫 Question for Today

What are the different types of Activities related Queue?

✅ Answer

★ In UiPath, you can perform several activities related to queues. Below activities allow you to add, manage, and process items in queues.

Add Queue Item: Adds a new item to a specified queue.

Add Transaction Item: Adds a new item to a specified queue with InProgress status.

Bulk Add Queue Items: Adds multiple items to a queue in a single call.

Delete Queue Items: Deletes specified items from a queue.

Get Queue Items: Retrieves a collection of queue items based on specified filters.

Get Transaction Item: Retrieves an item from the queue for processing.

Postpone Transaction Item: Postpones a queue item to be processed at a later time.

Set Transaction Progress: Updates the progress of a transaction item while it is being processed.

Set Transaction Status: Updates the status of a queue item (e.g., successful, failed).

10 Wait Queue Item: Waits for a queue item to become available in a specified queue
