

☀️☀️☀️ Day 51 of Our Daily UiPath Q&A Challenge! ☀️☀️☀️

Welcome to Day 51 of our exciting UiPath Q&A Challenge! Each day, we'll be answering one key question to help you master UiPath and revolutionize your automation journey. 🚀

🚫 Question for Today

What is the User Mode Robot Service?

The **User Mode Robot** is best suited in **attended automation** scenarios as it runs under the user that starts it and has the exact rights as that particular user.

Installing the Robot from **UiPathStudioSetup.exe** deploys the User Mode Robot by default. It can also be installed from **UiPathStudio.msi** or the **Command Prompt**.

By default, the start of the Robot Service is triggered by user sign-in when the service is set to run at login time. If it's not set to run at login time, opening the UiPath Assistant starts it automatically.
