

🌟🌟🌟 Day 32 of Our Daily UiPath Q&A Challenge! 🌟🌟 🌟

Welcome to Day 32 of our exciting UiPath Q&A Challenge! Each day, we'll be answering one key question to help you master UiPath and revolutionize your automation journey. 🚀

🚫 Question for Today

How to create Queue Trigger?

✅ Answer

Go to Automations Tab ➡ Go to Triggers Tab ➡ Go to Queue Triggers Tab

Click on add trigger button.

Add Meaningful Name for trigger.

Select the process which needs to be triggered.

Select the Queue.

Minimum number of items to trigger the first job - The job is only started after the targeted queue has at least this number of new items.

Maximum number of pending and running jobs allowed simultaneously - The maximum number of allowed pending and running jobs.

Another job is triggered for each __ new item(s) - A new job is triggered for each number of new items added on top of the number of items defined for the first option.

After completing jobs, reassess conditions and start new jobs if possible - If selected, the queue trigger is evaluated after each job completion, and new jobs are started if robots are available.

10 Click on Add button.
