

☀ ☀ ☀ Day 3 of Our Daily UiPath Q&A Challenge! ☀ ☀ ☀

Welcome to Day 3 of our exciting UiPath Q&A Challenge! Each day, we'll be answering one key question to help you master UiPath and revolutionize your automation journey. 🚀

🔴 Question for Today

What are the Different types Workflows in UiPath?

✅ Answer

- 1 Sequences: A sequence is a small type of project that is best suited for linear processes. It enables developers to transition from one activity to another easily. You can reuse them numerous times.
- 2 Flowchart: You can use them for large or small projects that help develop complex businesses and connect activities in various ways. Flowcharts assist in the presentation of multiple branches of logical operators.
- 3 State Machine: A state machine is a machine that uses a certain number of states for automation during execution. It will only change states if you perform an action on it.
