🌟🌟🌟 Day 29 of Our Daily UiPath Q&A Challenge! 🌟🌟🌟

Welcome to Day 29 of our exciting UiPath Q&A Challenge! Each day, we'll be answering one key question to help you master UiPath and revolutionize your automation journey. 🚀
⛔ Question for Today
What is Trigger and types of trigger ?

✅ Answer

✳ Triggers enable you to execute jobs in a preplanned manner. The Triggers page enables you to create new triggers, manage existing ones, or instantly launch a job based on an existing process.

♾ Trigger types ♾

Time triggers - They instruct the automation to start at regular intervals.
Queue triggers - They instruct the automation to start whenever new items are added to your queues.
Event triggers - They instruct the automation to start whenever a specified event occurs.
API triggers - They allow you to start a job in an external application.

(I will explain each of them briefly in next posts..)
