🌟🌟🌟 Day 78 of Our Daily UiPath Q&A Challenge! 🌟🌟🌟

Welcome to Day 78 of our exciting UiPath Q&A Challenge! Each day, we'll be answering one key question to help you master UiPath and revolutionize your automation journey. 🚀

⛔ Question for Today

Explain the Status Bar in UiPath Studio.

The Status Bar

In the status bar, you can view status information and access options related to Orchestrator and source control:

- **Orchestrator/Cloud Connection** - Click [icon] to access Orchestrator options: sign in to your cloud account, disconnect from Orchestrator (if connected with a machine key), and refresh resources.
- **Orchestrator Status** - Displays the Orchestrator connection status. When connected to Orchestrator, the currently selected folder is displayed. You can click the name of the current folder to view a list of available folders and select another folder from which to sync resources.
- **Source Control** - Depending on whether the project is connected to a source control repository, different options are available to help you manage source control integration.
- **Cloud Project** - For cross-platform projects that use the VB language, a menu is available with options related to editing the project in Studio Web. If a project is not already synced with Studio Web, the label Cloud Compatible is displayed. If the project is already synced with Studio Web, the label Cloud Project is displayed.
- **Project Language** - Displays the language used for expressions in the project, VB or C#.
- **Project Compatibility** - Displays the compatibility of the project, Windows - Legacy, Windows, or Cross-platform.
