🌟🌟🌟 Day 54 of Our Daily UiPath Q&A Challenge! 🌟🌟🌟

Welcome to Day 54 of our exciting UiPath Q&A Challenge! Each day, we'll be answering one key question to help you master UiPath and revolutionize your automation journey. 🚀

⛔ Question for Today

What are the best practices while creating Tenant and Folders?

Tenant Creation:

- Create separate tenants for different environments, such as Development, Testing, and Production. This helps maintain clear boundaries and restricts permissions.
- Avoid creating tenants for individual departments; instead, use folders to manage departmental processes.

Folder Structure:

- Use modern folders to organize processes and assets based on projects or organizational units.
- Plan folder structures carefully, considering future scalability and security.
- Assign permissions at the folder level to ensure users only access relevant processes and queues.
