🌟🌟🌟 Day 109 🌟🌟🌟
of Our Daily UiPath Q&A
Challenge!

Welcome to Day 109 of our
exciting UiPath Q&A Challenge!
Each day, we'll be answering one
key question to help you master
UiPath and revolutionize your
automation journey. 🚀

⛔ Question for Today

How can you log custom messages
in RE-Framework?

✅ Using the Log Message Activity

1. Drag and drop the Log Message activity from the Activities panel.
2. Set the Log Level (e.g., Info, Trace, Warning, Error, Fatal).
3. In the Message field, enter your custom message. You can include variables using string interpolation or concatenation.

✅ Using Log Fields for Custom Logs in Orchestrator

You can also use the Add Log Fields activity to include custom key-value pairs in your logs, which can be very helpful for filtering and analysis.
