🌟🌟🌟 Day 129 🌟🌟🌟
of Our Daily UiPath Q&A Challenge!

Welcome to Day 129 of our exciting UiPath Q&A Challenge! Each day, we'll be answering one key question to help you master UiPath and revolutionize your automation journey. 🚀

⛔ Question for Today

How to Fix Missing or Invalid Activities?

Fix Missing or Invalid Activities

Missing or invalid activity

! This activity is either missing or could not be loaded properly

Output

△1 !0 ①1 ①2

Search

⚠ Could not find type 'UiPath.PDF.Activities.PDF.GetPDFPageCount' in assembly 'UiPath.PDF.Activities'. Row: 53, Column: 6

Here are the situations when an activity can appear as missing or invalid:
- Package version newer than the one you have installed.
- Invalid project dependency; can occur when the dependency's version cannot be found due to different library versions.
- Missing project dependency.

After applying one of the above steps for identifying the problem, you can go ahead and fix it by installing a newer package or package version. All you need to do is to access the Manage Dependencies option and search for the desired package.
